

Bubble Film Data Sheet

- **Material Identification:**

Bubble Film / Bubble Wrap

- **Chemical Component:**

Polyethylene

- **Composition:**

Low Linear Polyethylene

Low Density Polyethylene

High Density Polyethylene

Recycled Content, a minimum of 30% (combination of post-industrial and post-consumer waste)

- **Hazard Identification:**

This product is not classed as hazardous

- **Physical and Chemical Properties:**

Appearance - Colourless with opacity ranging from clear to cloudy

Odour - Odourless

Melting Point - Approx. 105c

Auto Ignition - Approx. 350c

- **Stability and Reactivity:**

Chemical Stability - Stable under normal handling and Storage

Conditions to Avoid - Excessive Heat

- **Disposal Information:**

This product can be re-used or recycled

Scrap materials can be disposed of at approved landfill sites, recycled and incinerated under approved conditions
