

Bubble Film Data Sheet

- Material Identification:
Bubble Film / Bubble Wrap
- Chemical Component:
Polyethylene
- Composition:
Low Linear Polyethylene
Low Density Polyethylene
High Density Polyethylene
Recycled content up to 15% which is from post production waste of the above
- Hazard Identification:
This product is not classed as hazardous
- Physical and Chemical Properties:

Appearance	-	Colourless
Odour	-	Odourless
Melting Point	-	Approx. 105c
Auto Ignition	-	Approx. 350c
- Stability And Reactivity:

Chemical Stability	-	Stable under normal handling and storage
Conditions to avoid	-	Excessive Heat
- Disposal Information:
This product can be re-used or recycled
Scrap materials can be disposed of at approved landfill sites, recycled and incinerated under approved conditions
