Strong & Robust

Paper Strapping is a completely recyclable alternative to polypropylene plastic strapping and has been designed to be used in automatic or semi-automatic production operations.

Purpose

Strap, bundle and secure parcels and products in an environmentally friendly way.

Challenges

Conventional polypropylene or polyester strapping is difficult to recycle and often gets put into landfill or ends up in the countryside, on verges, in rivers or even in the oceans.

PaperStrap Solution

Paper Strapping is a completely recyclable alternative to polypropylene plastic strapping. It is designed to be used with automatic or semi-automatic production operations. The strapping requires less energy to apply than its plastic counterparts and will work in the same machines with the same settings.

Benefits:

- Biodegradable & Environmentally Friendly
- Helps to Reduce Operational Costs
- Quick & Easy to Apply
- Strong & Robust
- Compatible with Automatic or Semi-Automatic Machines
